

TESTOSTERONE YOU GOT IT

WHAT EVERY WOMAN **IS MISSING**

The natural division of the sexes drastically differs in the secretion of hormones in men and women, and therefore in the profile of attitudes and behavior (called behavioral profile). This will not be changed by fashion or imposed norms. Women are attracted to what is masculine and men are attracted to what is feminine. That's why a large branch of industry has always worked so that a woman can see what is feminine in herself, and MEGABOL - so that... a woman could see in you what she doesn't have, but she can get by having you. **On your terms.**
